MethiMax

(High Purity DL-Methionine for Poultry)

Methionine is an essential amino acid that birds cannot synthesize in sufficient amounts on their own, so it must be supplied through the feed.

Why DLM is important :

DLM works as a nutritional supplement that supplies the methionine required for:

- Faster growth in broilers
- Better egg production in layers
- Feather development
- Improved feed efficiency
- Liver health and metabolism
- Supporting the immune system

Composition : DL -Methionine –99%

Benefits :

- Supports muscle development and body weight gain in broilers.
- Helps birds utilize feed nutrients more efficiently.
- Improves egg laying performance and egg size in layers.
- Essential for healthy feather growth and feather quality.
- Helps in fat metabolism and reduces fatty liver problems.
- Contributes to better health, productivity, and uniform growth.

Target birds : Broiler, Layer and breeder

Dosages : 1.5-3 kgs Per ton of feed

Pack size : 500 gms & 1000 gms
