Toxosorb

(Advanced Mycotoxin Binder)

Toxosorb is used to neutralize harmful mycotoxins such as aflatoxins, Ochratoxins and T-2 toxins in poultry feed. It can prevent toxins from absorbing into the birds' bloodstreams, which helps maintain flock immunity, protects liver health, and improves the Feed Conversion Ratio (FCR).

How it works :

- Binding toxins inside the digestive tract
- Preventing toxin absorption into blood
- Helping toxins pass safely through droppings

Composition :

Finest quality of bentonite
Propionic acid
Formic acid
MOS
Other excipients

Benefits :

- Protects liver and gut
- Improves immunity
- Better feed efficiency (FCR)
- Promotes growth and egg production
- Reduces mortality

Target birds : Broilers, Layers and breeders

Dosage :

For prevention : 1 kg/Ton of feed
For treatment : 1.5 to 3 kg/Tone of feed

Pack size : 1 kg, 5kg & 25 kgs.
